📍 Mannarkkad, Palakkad 🌐 <https://github.com/Riyas306>

🌐 <https://www.linkedin.com/in/muhdriyas>

Full-Stack Developer with 4+ years of experience building scalable web applications using Laravel for the backend and React for dynamic, responsive frontends. Skilled in REST API development, Flutter mobile apps, and real-time applications with Firebase. Known for writing clean, maintainable code and collaborating in Agile teams. Open to international roles focused on Laravel, React, or full-stack development.

WORK EXPERIENCE

INFOLKS PVT LTD - *Full-Stack Developer*

Mannarkkad, Palakkad

10/2021 - Present

- Developed and maintained backend systems using Laravel, including the creation and management of RESTful APIs to facilitate seamless communication between frontend and backend services
- Designed and implemented responsive, user-friendly interfaces with React, integrating with backend APIs to ensure smooth data flow and functionality.
- Led the development of a mobile application using Flutter, with Laravel serving as the backend.
- Collaborated with cross-functional teams to integrate third-party APIs and services, adding new features and expanding application capabilities.

FLEMING EMBEDDED AND SOFTWARE SOLUTIONS - *Python Intern*

ERNAKULAM, KERALA

11/2018 – 4/2019

- Assisted in developing Python-based applications
- Proficient in maintaining and managing databases using MySQL and SQLite for effective data storage and retrieval.
- Knowledgeable in creating desktop applications using the Tkinter library, providing intuitive and user-friendly interfaces.

PROJECTS

IT Support Ticketing System

Stack: Laravel, Tailwind, MySQL, Alpine.js, JavaScript

Role: Full-Stack Developer (Solo)

- **Description:** Designed and developed a comprehensive web-based support ticketing system to efficiently manage IT-related issues in an organization. The system includes role-based

access for Admins, Support Engineers, and Users, streamlining ticket handling from creation to resolution and performance reporting.

- **Responsibilities:**

- Role-based access control: Admin, Support Engineer, and User modules with distinct functionality.
- Ticket Lifecycle Management: Raise, assign, track, and resolve IT support tickets with status updates.
- Engineer Performance Overview: Visual reports for resolution time, on-time completion, and workload trends using charts and color indicators.
- Admin Dashboard:
 - User management and role assignment
 - Ticket prioritization and expected resolution time setup
 - Reports by date, engineer, and ticket status
- Engineer Dashboard: Assigned tickets overview, status updates, and task performance visualization
- User Portal: Secure ticket submission with OTP-verified registration, status tracking, and history filtering
- Mobile-responsive interface for usability across devices

HR Panel

Stack: Laravel, Tailwind, MySQL, Alpine.js, JavaScript

Role: Full-Stack Developer (Solo)

- **Description:** Developed a comprehensive Admin Panel for HR management, featuring user data maintenance, attendance tracking, user authentication, role-based permissions, and observer functionality.
- **Responsibilities:**
 - Designed and implemented the user interface using Tailwind CSS and Alpine.js, ensuring a responsive and intuitive experience.
 - Developed backend functionality with Laravel, including user authentication and role management.
 - Integrated APIs to facilitate communication between the front end and backend services.
 - Utilized MySQL for data management, ensuring efficient storage and retrieval of user data and attendance records.

Online Food Ordering System

Stack: Laravel, Bootstrap, JavaScript, SQLite

Role: Full-Stack Developer (Solo)

- **Description:** Developed a complete online food ordering platform, featuring a cart system and user authentication for a seamless ordering experience.
- **Responsibilities:**
 - Designed and implemented the frontend using Bootstrap for responsive design, ensuring a user-friendly interface.
 - Developed the backend with Laravel to handle user authentication, order processing, and cart management.

- Utilized SQLite for database management, enabling efficient data storage and retrieval for user orders and menu items.
- Integrated JavaScript to enhance the interactivity of the cart and ordering features.

Interview Panel

Stack: Laravel, Bootstrap, JavaScript, MySQL

Role: Full-Stack Developer (Solo)

- **Description:** Spearheaded the development of a web application designed for conducting online exams as part of the interview process, featuring automated scoring and real-time result display.
- **Responsibilities:**
 - Led the development of the application's backend using Laravel, including features for exam creation, user management, and automated scoring.
 - Designed and implemented a responsive user interface with Bootstrap, ensuring a seamless experience for both candidates and administrators.
 - Utilized MySQL for database management, handling the storage and retrieval of exam data, user responses, and scoring information.
 - Integrated real-time result display to provide immediate feedback and enhance the efficiency of the interview process.

Online Hall Booking System

Role: Mobile Application Developer

Stack: Flutter, Dart, Firebase, Laravel, MySQL

Role: Full-Stack Developer (Solo)

- **Description:** Developed an Android application for booking meeting halls, offering users a seamless experience to search, book, and manage reservations.
- **Responsibilities:**
 - Designed and developed the mobile application using Flutter and Dart, ensuring a smooth and responsive user interface.
 - Implemented RESTful APIs with Laravel to facilitate communication between the mobile application and the backend server.
 - Utilized Firebase for real-time data synchronization and user authentication, enhancing the application's performance and security.
 - Managed backend data and reservations with MySQL, ensuring efficient data handling and retrieval.
